

Mountain View Council Meeting

All councillors were present and Reeve Flinn occupied the chair at the meeting of the Mountain View M.D. council held at Olds on Saturday last.

The closing down by the government of the work on the Olds Sundre road was discussed. The district was interested in one and a half miles on this road and Councillor Dodd was appointed delegate to co operate with the other districts interested in this road.

It was reported that the first program of road construction with elevator grader had been completed and it was decided to commence the construction of an additional ten miles of road in Divisions 1, 2, 3, 4 and 5.

A communication was read from the Department in respect to bridge requirement for next year. It was decided to ask for renewal of the bridge north of Coburn School, the bridge on the Rosebud 1 mile north of Didsbury and the bridge on the Lone Pine 7 miles east and 2 miles south of Olds.

A communication was also read asking for the requirements of feed and seed grain in the district due to the hail and frost conditions.

The condition of the road leading east from Didsbury was discussed and Councillor Rupp was authorized to arrange with the Town of Didsbury regarding the matter.

Grants of \$100 to the Olds Agricultural Society and \$15 to the Community Hall School Fair were made.

Speakman Reviews Parliamentary Record

At a meeting held in Didsbury on Friday night Mr. A. Speakman, the UFA candidate for the Red Deer constituency, reviewed his work at Ottawa during the five years since the last election.

He pointed to the work that had been accomplished for the benefit of the returned soldiers by the committee of which he was chairman, and spoke of his activities in connection with the "Marketing Act." He was in sympathy with many of the reforms promised by Mr. Bennett, but claimed that they did not go far enough. He spoke of the good work that had been accomplished by the small group in the House, of which he was a member, and claimed that they had been the means of furthering much of the reform legislation.

BIRTHS

at Didsbury General Hospital

October 2nd, to Mr. and Mrs. Gilbert Holmquist, a daughter.

October 2nd, to Mr. and Mrs. Henry Luft, a son.

A motion was passed authorizing the Secretary to arrange with the bank for credit to carry on the balance of the season.

The balance of the meeting was taken up with passing of accounts and pay sheets and other routine business.

Work Stops on Sundre Road

All work on the Olds-Sundre highway has been ordered to cease by the Public Works Department of the new provincial government. The order came Monday, and following the spreading of the news much speculation became rife as to the real reason for this cessation of work. It is thought, however, by local men in close touch with the road situation, that the halt in the project is but temporary, as it would be utterly folly not to complete the road when it has almost reached the stage when gravel can be applied to its graded surface.—Olds Gazette.

Married In Australia.

HISLOP—PEARSON

At seven o'clock Friday evening, August 23, a wedding of interest to friends in Didsbury was solemnized at St. Mark's Anglican Church, Sydney, Australia, when Miss Alice Elizabeth Pearson, daughter of Mr. and Mrs. H. E. Pearson, became the bride of Mr. John Smith Hislop, son of Mr. and Mrs. Charles Hislop, of Carstairs. Prior to going to Australia Mr. Hislop was manager of the Minaret Elevator.

The bride, wearing a blue and gold floral gown, blue picture hat, and carrying an Early Victorian posy of yellow spring flowers and forget-me-nots, was given in marriage by Mr. J. Bannister, of Sydney.

Mrs. Wallace Carruthers attended the bride as matron-of-honor, wearing brown lace, brown hat, and a corsage of red camillias.

Canon Lee, of St. Mark's, officiated, and Mr. Gilbert Dawson acted as best-man to the groom.

After the quiet ceremony the bride and groom attended a reception given in their honor at the home of Mrs. Barr Malcolm, of Darling Point. About twenty guests were present, among them friends the bride had made aboard ship on her recent voyage to Australia.

Mr. Bannister, in a toast to the bride, welcomed Mr. and Mrs. Hislop to their newly-adopted country, and wished them much happiness and prosperity.

After the reception the bride and groom left for Mossman, Sydney, where they spent a few days at Burrawang, the beautiful home of Mr. and Mrs. A. Copeland, who are at present in Canberra.

On their return Mr. and Mrs. J. Hislop will reside at "St. Clair," Oswald Street, Edgely, Sydney.

Mons Chapter I.O.D.E. Entertain Provincial Officers

In honor of Mrs. R. C. Marshall, Provincial President of the I.O.D.E. and Mrs. G. Kenchtel, organizing Secretary, who are visiting the various Alberta Chapters, the Mons Chapter entertained at the home of Mrs. A. R. Kendrick last Thursday afternoon.

Following the business meeting, Mrs. Kenchtel gave an interesting talk on organizing new promising chapters in the Peace River district. Mrs. Marshall, in her usual charming manner, told about the different departments of the I.O.D.E. work, and of how the members' help, whether large or small, would mean much to the Alberta branch and the Empire at large.

Autumn flowers centred the tea-table at which Mrs. W. G. Evans presided, Mrs. W. G. Liesemer cutting the ices. Assisting in serving were Mrs. Russell Bercht, Mrs. C. R. Ford, Mrs. J. W. Phillipson and Miss Wynne Studer.

The Regent, Mrs. Hugel, presented Mrs. Marshall and Mrs. Kenchtel with a small gift to show the appreciation of the chapter.

CARD OF THANKS

The matron and nurses of the Didsbury Hospital wish to thank the ladies of the St. Cyprian church for their kind donation of vegetables, fruit, etc.

Candidates Total 892.

Final nominating across the Dominion yesterday left a record-breaking total of 892 candidates in the ring. Electors will send slightly more than one-quarter of them to Ottawa in next Monday's general election. The previous record was 644 in 1921.

Social Credit Meeting.

Eric Poole, the Social Credit candidate, spoke at a meeting in Didsbury on Monday evening and outlined the principles of Social Credit, which he claimed was the only policy that would bring prosperity to the Dominion.

Miss Dingman of Red Deer and Mr. J. McDougall also spoke.

Will Rogers at Best in 'Country Chairman'

The movie fans of Didsbury will have another treat next Wednesday and Thursday, when Will Rogers is here in "Country Chairman."

"The Country Chairman" has been adapted from George Ade's famous stage play of a generation ago and deals with small-town policies back at the turn of the century. Their colorful personalities, their frenzied rallies, their intense feeling made of them a very different "game" from politics today—conducted with reserve and dignity via the radio.

He is supported by a notable cast, which includes Evelyn Venables, Kent Taylor, Louise Dresser, Burton Churchill and Stepin Fetchit.

To Burn Or Not To Burn

There will be few people in Western Canada, whether farmers, business men or wage earners who will quarrel with the policy which resulted in the announcement of the Canada Grain Board's establishment of a minimum price of 87½ cents for No. 1 Northern wheat f.o.b. Fort William.

Regardless of political affiliations or economic beliefs the general public in the west greeted the announcement with approval as soon as it was made and, it is to be hoped, it will be accorded general backing in the east as well.

But the extent to which this policy will ensure to the benefit of Western farmers, who are hard pressed as a result of a prolonged period of drought, followed this year by a most disappointing situation as a result of wide-spread ravage of the wheat crops by rust, will depend upon the price spreads which, at the time of writing, are expected to be announced any day.

As harvesting and threshing operations progress, the amount of damage from rust is being daily revealed as a disaster of immense proportions, and while estimates of the extent of the loss sustained by farmers in Manitoba and Saskatchewan vary from day to day, it is quite apparent that the final figures will show a loss of great magnitude.

The rust which invaded large tracts of the best wheat growing areas of the west with such devastating effect, has not only reduced yields of what earlier in the season promised to be abundant crops but it has depreciated the grades to an extent comparable with the lowered yields.

At the moment there are thousands of acres of low grade wheat standing in the field awaiting the time when the grain is sufficiently dry to ensure a good burn because it does not pay to cut it.

Before taking this drastic action to destroy a lot of grain which conceivably may be of some value at a future date, farmers would be well advised to at least await the promised announcement of spread prices. It is quite possible that the spreads may be set at such figures that even the lowest grade wheat can be threshed and stored on the farm without too serious loss to the grower.

The Federal government has recognized the loss sustained by farmers through drought in the past few years as a national calamity and it is surely reasonable to suppose that the loss from rust this year will be regarded in the same category and that recognition will be given to the fact when minimum prices for the lower grades are set.

No one can gainsay the statement that the blame for damage by rust cannot be laid at the farmer's door. Rust damage is just as much a national calamity as the drought loss of recent years and, this being the case, there is every reason why the national purse strings should be loosened to relieve the predicament in which such a large number of Western farmers find themselves with winter knocking at the door.

It must be remembered that the grain about to be delivered to the flames has already cost the farmer something in outlay and labor and would cost more if it were cut, threshed and hauled to the elevator.

Unfortunately the present market price is too low to cover all these costs, without taking into consideration any margin of profit for the farmer who raised the grain.

If the crop is destroyed by fire not only does the grower lose what he has already put into it in cash and labor, but it represents a loss to the country at large. It might be well worth the country's while to advance the farmer at least sufficient money to save the grain by way of a fixed minimum price, thus salvaging what has already been spent on the crop and perhaps saving what might otherwise have to be expended later in the form of relief.

Such a measure might well be regarded in the light of a partnership between the individual and the nation for the mutual benefit of both.

There is also the question of the effect on the morale of the unfortunate grower. After losing a series of crops from drought the economic necessity of burning a crop which was not very long ago so promising must have a disheartening effect on the stoutest heart. If this effect can be averted without serious financial loss to the country, it may be well worth the expenditure.

Flies Prefer Orange Color

Primrose Yellow Is Second Choice And Carmine Third

It's this way with flies—they'd rather sit on an orange than a cucumber, if the choice depends on color. Such was the deduction announced at the University of California recently as a result of scientific observation of color preferences of multitudes of flies. A huge checker-board with eleven-inch squares in various colors was hung up in a dairy barn of the university's college of agriculture. The flies were invited to come and make themselves at home. For three months this went on while Lester J. Berry, graduate student in charge of the experiment, and his aides kept watch. The tabulated results announced by Berry follow: Not less than 10,572 flies parked on the orange square while only 2,067 sought out the green. Primrose yellow drew 6,541; carmine, 4,415; light blue, 3,480, and white, 2,360. More esthetic flies went after coral red and pink.

Buried Eloquence

The mayor had just laid the foundation stone of a new wing for the hospital, and the spectators awaited his speech.

"What can I do?" cried the harassed mayor to his wife. "I've laid the stone on top of it."

Would Increase Efficiency

Scientific Investigators Recommend Five Light Meals A Day

When you eat a meal, what is the effect on your work? Scientific investigators have repeatedly investigated, and repeatedly answered that the effect is bad. But their studies have generally been based on the assumption that the meal is about one-third of your daily diet, since you eat three meals a day. Now Howard W. Haggard and Leon A. Greenberg, in a book, "Diet and Efficiency," report that the best schedule is five a day, all comparatively light, and that after a light meal in mid-morning or mid-afternoon your efficiency is increased 10 per cent.

This conclusion refutes the older American tradition, which had its basis in farm life. But it is in accord with the habit of many office-workers, and it corroborates the advertising appeals of several candies and soft drinks.—Business Week.

A Good Suggestion

The young bore at the party, who was doing his share of the entertaining, had already exceeded the time-limit.

"Now, continuing my imitations," he said, "I can mimic any bird. Will somebody name a bird, please?"

"A homing pigeon," suggested one of the company. 2116

Bomb Shelter De Luxe

City Of Paris Making Provision For Air Raids

Thirty feet under the ground in the Avenue Foch, one of the most fashionable residential streets in Paris, a model concrete shelter has been constructed for use in the event of air raids. The shelter consists of several rooms equipped with all conveniences, including apparatus for detecting the presence of poison gas outside. It will serve as the model for many more which are to be built by the city of Paris. It is built under a mansion. Its roof is a block of concrete six feet thick. Above this is 10 feet of earth then a one-foot thick block of concrete, and finally another layer of earth. Two stairways lead to the shelter, and at the foot of each is a steel and concrete door weighing a ton. There are special rooms for giving first aid to injured persons, machine rooms for light and ventilation purposes and storerooms. Although it is connected with the city's regular light supply, the shelter is equipped with generators and batteries for providing its own light if necessary.

China Has New Tax

After Next May Those Who Cannot Read Will Be Fined

China has announced that after May 1, 1936, anyone in Nanking between the ages of six and fifty who cannot read will be fined. Appalled at the ignorance of the people of the capital, the Chinese authorities have issued a primer of 1000 characters and ordered students to teach the ignorant from it or give up hope of graduation. As half the population of the city cannot read, the students will be kept busy until the new law goes into effect. The police will be the official examiners, and will stop anyone they wish who if he fails to read the primer, will have to pay the equivalent of half a cent on the spot. The penalty is called the Ignorant People's Tax.

Parliament In Jerusalem

Arabs Expect Early Establishment Of Council In Palestine

Early establishment of a legislative council in Palestine is considered so certain Arab leaders are merely awaiting a British "Order in Council" establishing the parliament before disclosing their position. It was stated by Mirat-Ash-Sharqan semi-weekly Arab newspaper. The Jews of Palestine have made it clear that under no conditions will they accept a legislative council at this time.

Jelly-Fish Kills Man

Sting Of Giant Type Proved Fatal To Italian

A sting by a giant jelly-fish has resulted in the death of Salvatore Cantarella, an Italian cane farmer near Brisbane. He was bathing at Coogarra Beach when he suddenly cried out loudly for help. His companions rushed out and pulled him ashore. He was given artificial respiration and restoratives but in vain, and he died on his way to the hospital. Tentacle marks were found on his body and it was at first thought that he had been attacked by an octopus. Later, however, it was found that he had been paralysed by a giant "Portuguese Man of War," a type of jelly-fish that is found along the Queensland coast. These jelly-fish often have tentacles up to 12 feet long, and their sting is capable of causing temporary paralysis.

A species of honey-making wasp is found in Mexico and the southern part of Texas.

Lost Books Found

Volumes Missing For 41 Years Returned To Prince Albert Man

Two books which Alderman G. H. Carr of Prince Albert believed he had lost in Greenland 41 years ago when a member of Admiral Peary's 1893-94 North Pole expedition, turned up recently—in the mail.

Mr. Carr was notified a parcel of books awaited him at the customs office. On opening the parcel he discovered his two volumes of Stanley's "In Darkest Africa," which he had read during the long Arctic night while the polar party waited to begin the futile dash for the North Pole.

They had been discovered among Peary's effects and forwarded by the admiral's daughter, Mrs. Edwin Stafford, of Washington, D.C.

Would Increase Sales

If every little market in the land and every large one could furnish its customers with top quality eggs, which could be bought with assurance just as good milk can be had at every corner store, we have no way of estimating what a benefit every producer of eggs would receive.

NATURE'S OWN SALT-TREATED SPEEDWAY

While Canadian engineers and research scientists have been working out methods of creating good highway surfaces by treatment with common salt, the world's most famous race-drivers have turned to natural salt-treated speedways for their world record attempts. Photo shows: A stock car speed test on the new speedway of the great salt desert in Utah where Sir Malcolm Campbell in his famous Bluebird set a new world's record and bettered 200 miles per hour.

HEAVY WAXED PAPER

Warehouses At Calgary, Edmonton, Regina and Winnipeg

After Ten Years' Research Scientists Have Evolved Rust Resistant Wheat

After a decade of intensive and laborious research in laboratories and on experimental farms, wheat that will resist the attack of rust and that will mill and bake as well as Marquis and Reward varieties is nearing the stage when there will be quantities available for distribution to the farmers of western Canada in 1937.

In fact, on Dominion experimental farms in different districts in the west small plots of this wheat, which is as yet only identified by a number, could be seen this summer, standing straight and tall with well-filled heads. Beside them in striking contrast were patches of ordinary rust-susceptible varieties, laid waste by the vicious parasite that robbed western Canadian agriculture of millions of bushels of wheat, and consequently millions of dollars, during the present crop year.

The development of this wheat, which will mean that in comparatively short time farmers will not have to worry about warm and moist July days, is not something that happened overnight. It is the outcome of the combined efforts of plant pathologists, plant breeders, milling and baking chemists who set to work in 1925 to find a strain of wheat that would not succumb to rust and that would possess milling and baking qualities as high as Marquis and Reward.

Wheat that was rust-resistant was developed early in the campaign to eliminate one of the greatest hazards of farming, and then came the work of producing a strain that would measure up to the high standards demanded by millers and bakers, for without them rust-resistant wheat would be worthless.

In 1933, after exacting tests of 33 rust-resistant types that had been evolved in the laboratories, six were regarded as suitable. Further tests reduced this number to two, and then efforts were concentrated on increasing the seed of these varieties so there would be sufficient for distribution to farmers.

Today one of these new wheats, unaffected by even the severe rust invasion of the present year and equal to Marquis and Reward in milling and baking, is almost ready for distribution to registered farmers. The first step in increasing the seed of the variety was carried out in the crop year of 1934. During the present year there were plots of it grown on Dominion government experimental farms and stations, weathering the rust, ripening early and yielding well.

One plot on the experimental farm at Morden, where moisture was rather scarce during the summer, returned 28 bushels to the acre. Next summer greater quantities will be grown for seed purposes on the experimental farms, and for 1937 it is expected that there will be sufficient to supply registered farmers with quantities. Then it will rapidly become available for general distribution.

This type has been developed by crossing Reward, which is world famous for its high milling and baking qualities, with a derivative from a Marquis-Emmer cross.

So far no official announcement of this rust-resistant wheat has come from the scientists in Dominion rust research laboratories in Winnipeg, in other branches of the Dominion department of agriculture, the experimental farms and the universities of the western provinces who have all co-operated in its development.

Its rust-resistant and milling and baking qualities have all been well proven by exhaustive testing, but naturally they have guarded against a premature announcement, not wanting to raise false hopes in the minds of an agricultural population that has waited so anxiously for a wheat that would not fade and wither under a rust attack. However, all the men who have participated in the developing and testing of this strain will meet in Winnipeg shortly—arrangements for the date of this meeting are already under way—then

final tests and checks on the quality will be compared and an announcement can be expected. Also, farmers can expect from this meeting information on the distribution of the available seed.

While this unnamed wheat might be thought to be the end of patient, unceasing search for a perfect wheat, it is not regarded as such by the scientists who have produced it. Research with scores of other varieties of rust-resistant wheat is still in progress, despite the concentration recently toward producing seed supplies of the varieties that have so far proved that the dread disease of the prairie wheat belt can be mastered. Even though these types show good yielding ability, ripen early and meet milling and baking requirements, rust research will go on. The scientists' attack on other field crop diseases—root rots, ergot and loose and covered smuts—will continue.

Their efforts recently have also included more and more work on oat rust. One variety, known as Anthony oats, has been already produced, and it is highly resistant to stem rust. However, this variety is not capable of fighting off crown rust (orange rust), which attacks the leaves of the oat plant, thriving on the food that is intended for the development of the kernels.

J. N. Walsh, of the Dominion rust research laboratory, is one of the scientists who have devoted their energy to finding a strain of rust-resistant oats. In April, he announced in Winnipeg before the meeting of the associate committee of field crop diseases, the synthetic production of one or two promising new varieties which has been developed in the laboratory and was to be increased for distribution of the seed to farmers.

The Television Car

Projects Scenes Clearer To Radio Listeners Than To Audience

Recently, in Germany, there appeared the television pick-up car which carries on its roof a standard motion-picture camera mounted on a cast-iron roof, allowing the camera to be moved in any desired direction. The hollow pillar of the camera support is used to convey the exposed film ribbon to the dark room which is in the interior of the car. By use of special apparatus and extremely fast working chemicals, the film is developed in one and one-half minutes. The still wet ribbon of film is sent at once through a device which cuts the single film pictures in 180 lines and transforms each line in a succession of strong and weak electrical impulses. The impulses are radiated from a transmitter into the air and the radio listener, receiving these impulses, can see anything and everything that happens, often much better than the audience which is directly at the scene while the event is taking place.

Germany's One-Man Band

Made In 1805 Is Playing Again After 100-Year Rest

After resting for more than 100 years, the original one-man-band is playing again at the Provincial Trade Museum at Stuttgart, Germany, and its 259 instruments are frequently heard in blended harmony. The "Panharmonium," as it then was called, was constructed in Vienna, Austria, in 1805, by Maelzel, a Ratisbon mechanic. Beethoven composed a special symphony for it to celebrate the Duke of Wellington's victory at Vittoria in the Peninsular War. Now known as the "Orchestreon," the one-man-band includes 38 clarinets, 37 flutes, 36 hautboys, 16 bassoons, eight Trumpets and a large drum with cymbals and triangle.

Hoarding Money In Homes

Twenty-seven billion francs in gold and bills now is tucked away in the traditional French wool sock. Official statistics show that 1,000-franc bills are a prime favorite with hoarders, since more than seven billion francs worth have disappeared from circulation.

Use For Polar Winds

Scientist Believes They Are Potential Source Of Power

The screeching rivers of icy air which race over the barren polar regions will be harnessed by future generations and used for power when coal is scarce and oil is exhausted, Professor F. Debenham forecast in his presidential address before the geography section of the British Association for the Advancement of Science.

Prof. Debenham, in a paper on "Some Aspects of the Polar Regions," invited his listeners to compare the well-known power of Niagara Falls, about 6,000 tons of water falling each second, with the power in the little known Adelle land, "where an air river of at least 50 miles in width and probably some hundreds of feet in depth is moving outwards from the plateau at an average velocity of 50 miles per hour, or about 70 feet per second, most of the year."

Prof. Debenham said he did not wish to further anticipate some H. G. Wells of the future who will "ring the Antarctic with windmills producing power to be sent by wireless to the southern hemisphere, but the winds of the Antarctic have to be felt to be believed, and nothing is quite impossible to physicists and engineers."

May Be One Reason

The Port Arthur News-Chronicle says, a resume of Great War statistics show some of the principal losses, men known killed, as follows: Russia, 2,762,064; Germany, 2,050,466; France, 1,427,000; British Empire, 1,098,819; Austria-Hungary, 1,200,000; Serbia, 707,343; Italy, 507,160. This may explain in part Italy's present willingness to try it again.

The Farm Shelter Belt Is An Important Factor In Growing Vegetable Supply

Protein Content Of Wheat

Tests Are Made From Samples Of Western Crop

First tests of the 1935 wheat crop made by the grain research laboratory of the board of grain commissioners disclosed a protein content about equal to that shown in tests of the 1934 crop at the same period.

The average of tests from 27 points in Alberta last year showed a protein content of 14.5 per cent., and for this year the content from the same areas was 14.4 per cent. For the 176 points in Saskatchewan which showed a protein content last year of 15 per cent., the figure for the tests this year was 14.2 per cent. The Manitoba tests for 25 points was 12.8 per cent. compared with 13.6 per cent. last year.

So far 407 samples of the 1935 crop have been analyzed, comprising 48 samples from Alberta, 313 from Saskatchewan and 46 from Manitoba. Further tests will be made as the harvesting of the crop continues.

The combined production of Canada of all items of concentrated milk (condensed, evaporated, casein and powders) for the seven months of 1935, ended July 31, totalled 65,355,255 pounds, showing an increase of 9,307,998 pounds, or 17 per cent. over the corresponding seven months of 1934.

For the fiscal year ending June 30, 1936, the allotment to the Federal Department of Agriculture of the United States is \$125,113,483.

The relation and value of trees to the problem of drought and soil drifting in the three prairie provinces is being seriously studied by Dr. E. S. Archibald, Chairman of the Prairie Farm Rehabilitation Committee, the members of the committee, and associated workers. They are being guided in the matter of tree planting principally by Norman M. Ross, Chief of the Division of Tree Planting, Dominion Experimental Farms Branch, whose headquarters are the Dominion Forestry Station, Indian Head, Sask., from where in the past 25 years many millions of trees have been grown and distributed free to farmers in Western Canada. The Dominion Forestry Station at Sutherland, Sask., also comes under Mr. Ross' administration, and from there also millions of trees have been shipped to all parts of the prairies in recent years.

In discussing tree planting on the prairies, Mr. Ross, whose experience in tree planting in Western Canada extends over 37 years, says that one of the most popular ideas seems to be that drought can be controlled, the climate changed and rainfall increased, by the wholesale planting of trees. As a matter of fact, he explains, there is no scientific basis nor data to support the assumption that either climate can be changed or precipitation increased as a result of any tree planting programme which it might be practical to undertake on farm land specially adapted to cereal cropping.

In connection with the possible improvement in agricultural conditions that might be brought about by a wider planting of trees two main divisions may be considered: First, home shelter belt plantings, including protection for gardens, stable yards and small adjoining pastures; and second, field crop shelter belts for the protection of cereals and forage crops.

Those who have studied the situation in an endeavour to arrive at some agricultural policy which will guard against a recurrence of the drought conditions admit that what is needed is to try and make each individual farm self-sustaining during periods of drought and depression. This is where the farm home shelter plantings can play a very important role. Everyone familiar with prairie conditions knows that in average seasons, and particularly during periods of drought, it is practically impossible to grow a good supply of vegetables without adequate shelter.

The economic value of the farm garden perhaps has never been fully appreciated, Mr. Ross points out, but this has been shown up very definitely during recent years. In many cases the produce from a good farm garden has kept the farmer and his family off relief. With suitable shelter a supply of home-grown vegetables and hardy fruits can be practically assured unless conditions are extremely abnormal. These home shelter belts might well be extended to enclose small pastures and winter feeding paddocks on the average farm. The aesthetic value of such shelter belts is also extremely important.

The idea of field crop shelters is only going a step further and there is no reason to suppose that suitably disposed belts would not have a very beneficial influence. Shelter belts benefit growing plants by protecting them from mechanical injury during severe windstorms. They also lessen the force of winds, decrease evaporation of moisture, help to accumulate and hold snow during winter time and have a tendency to check soil drifting. While it is admitted there is no great amount of scientific data on this subject, it is known from general observation that in many districts very marked benefits have been noted, both in the saving of crops from drifting and in increased yields.

A Long Distance Paddle

John Goetz was happy even though he was so stiff he could hardly move and his hands were badly blistered. He had paddled 300 miles from his home in New York to Boston. Goetz, 35, New York City, lost 10 pounds during his 14 days of paddling.

The SNAPSHOT GUILD

Take Children's Pictures Now

Pictures like these will lend enchantment to your "Memory Album."

How many members of the Snapshot Guild have taken snapshots this summer of their children? It would be interesting to know for so few parents realize the importance of keeping what might be called a "Memory Album"—fascinating, story-telling pictures of their children.

The two pictures above are excellent examples of story-telling pictures—the kind you should strive to take for your "Memory Album." They were taken on just such a day as we hope to have tomorrow—sunshine and bright skies. Mother snapped little Billie as he was making a vain effort to sweep the front walk while Jane was apparently pleasure-bound with her toy dog and dolls. Aren't they real story-telling snapshots?

Suppose that you want to snap a picture of your little son or daughter playing or "working" in the yard. This is what you should do.

First of all don't try to get the child to pose, for the chances are he will appear in a stiff, unnatural position in the finished picture. Let him become busily engaged in whatever he is doing and then rather nonchalantly get as near to him as possible with your camera. If you have a box camera you should not be closer than eight feet. Have the

camera (if it is of the box type) set at the largest "stop" or lens opening and you are ready to "shoot" the minute your child unintentionally or intentionally, if he is a good actor—assumes an interesting pose or position. Be sure all of him shows in the finder or else he may appear in the finished print minus his head or an arm. Here's another simple precaution. The shutter on a box camera operates at a speed of approximately 1-25 of a second. This is not fast enough to stop action when the camera is close to the subject, so in taking the picture of your child wait until that moment when he is not in motion before snapping the picture for otherwise the image will be blurred.

If you have a folding camera with a footage scale you can work as close as six feet to your subject and get a larger image. Set the diaphragm control pointer at f.11 or if it is quite shady, at f.8. Set the shutter speed indicator at 1-25 of a second or number twenty-five. Locate the child in the finder and snap the picture.

Don't have the sun striking the child in the face and then expect him not to squint. Let the light come across his face and you will get interesting shadows and show his features much better. And there'll be no squinting.

"X" Marks the Spot.

WHEN YOU VOTE for your favorite candidate October 14 be sure you use only the black pencil provided in the polling booth, otherwise you may unwittingly lose your vote. The Election Act says that a cross, and nothing else, must be made with a black pencil opposite the candidate's name.

In the 1930 election 3,992,481 people voted, and of those, 24,119 lost their votes through improper markings on the ballots, or about one out of every 160 voters. In the approaching election it is likely that more than 25,000 people will lose their votes through improperly marking the ballots, and the risk is much greater this year on account of the larger number of candidates. Markings in addition to the cross, use of a pen or colored pencil instead of the black pencil provided, and signing of the ballot by the voter, are the most frequent causes of spoiled ballots.

Through habit many men use their fountain pens, and deputy returning officers throw out their ballots. (Exchange)

Items of Interest

The election which will be held Monday is particularly notable for the unusual number of candidates. All records will be exceeded for the reason that there was never so many contending parties. The aggregate of all deposits may near \$180,000, and as a condition to return is that a defeated candidate must poll half as many votes as a successful one, a substantial sum promises to reach the public treasury.

Jack Webb, 9-year-old son of D. H. Webb, 3 miles northwest of Swallow, was accidentally shot on Sunday by J. H. Wulff. The boys were shooting magpies when the .22 rifle caught in Wulff's clothing, pulling the trigger. The shot entered Webb's body just below the heart and his condition is considered serious.

Twelve persons aboard an east-bound United Air Lines mail plane crashed to their death about 15 miles west of Cheyenne early on Monday morning. The dead included nine passengers, the two pilots and the stewardess.

Stern warning to foreign born residents of Alberta that they must not attempt to vote at the forthcoming federal election unless they have received naturalization papers from Ottawa was given to about 30 applicants for British citizenship at the court house Monday by Mr. Justice T. M. Tweedie.

Contracts totalling almost \$2,700,000 were announced over the week-end by the government. Orders-in-council validating these contracts were passed at the cabinet meeting on Thursday but were not made public until after they had been signed by Administrator Sir Lyman P. Duff.

"BUY IN DIDSBURY"

Livestock Population.

Livestock census of Alberta as taken by card-survey in June by the federal bureau of statistics shows a slight increase in cattle and some decrease in the hog population.

Hog population is shown as reduced from 896,100 head in June of 1934, but the December survey should show a considerable increase in cattle and some decrease in the hog population.

Cattle population shows an increase from 1,570,000 head.

Horses are reduced from 698,300 head, to 691,300 head. Sheep show a drop from 696,200 head, to 639,600. Poultry totals 5,783,200, compared to 6,992,000 in 1934.

Notice to Relatives of Persons On the Assessment Roll And to Tenants

Notice is hereby given that during the months of September and October, applications may be made under the provision of section 188 of the Town and Village Act for inclusion in the voters' list of the town of Didsbury by the following persons, namely:

The wife, husband, father and mother and every son and daughter of any person whose name appears on the assessment roll who are entitled to be placed upon the said list—

(a) if he or she is resident within the said person within the town or assists in a business in respect of which he is taxable; and

(b) if he or she is of the full age of twenty one years; and

(c) if his or her name does not already appear on the roll;

Tenants who have rented an assessed parcel for a period of twelve months immediately preceding the last day of August of this year.

To the Electors

Red Deer Federal Constituency

Ladies and Gentlemen

On October 14th the electors of this Dominion will be called upon to choose a representative for the Constituency of Red Deer in the Federal House of Parliament. It is fitting, therefore, at this time, that we should give careful and studious thought as to what effect each individual's ballot may have with respect to the future of this country. It is a fact recognized by all that the next government will be headed by either Mr. Bennett or Mr. King; therefore, it behooves us to study the policy of these two men so that we may, from a study of their past record, form an opinion as to what we might expect from a future administration of either of these men.

During the Liberal Administration from 1920-1930, the world at large enjoyed an era of prosperity brought about to a large extent by purchases made by European nations in an effort to rehabilitate themselves after the devastation wrought during the great war. The prosperity from these purchases was financed largely by borrowing, and was to a great extent, a speculative prosperity. This was proven in 1929, as the pinnacle of world production, our supposed prosperity collapsed like a house of cards. The Liberal administration I do not think would like to assume the responsibility for the world collapse in 1929, and are therefore, are not entitled by any means to take unto themselves the credit for the prosperity of the world previous to that time; neither should Mr. Bennett be held responsible for the upheaval of 1929 which took place while he sat in opposition, nor for the world depression of the past five years which had its beginning the year previous to his assuming office. Let us then with a non partisan unbiased mind look up the record of achievement of these men and see just how their policies and their actions affected our national welfare, and as agriculture is the very foundation of Canada's well being, let us make our studies from the agriculturist's viewpoint. When Mr. King went into office, France had a tariff against our wheat of eleven cents a bushel and against our flour of twenty-four cents a hundred. When he left office, France had placed a tariff against our wheat of eighty-five cents a bushel and against our flour of \$2.28 a hundred weight. When he went into office, Italy admitted our wheat and flour free. When he left office, Italy had placed a tariff against our wheat of seventy-three cents and against our flour of \$2.08. When Mr. King assumed office, Germany also admitted our wheat and our flour free. When he left office, Germany had placed an import duty against our wheat of ninety-eight cents a bushel and against our flour of \$3.40 a hundred weight. Those high tariffs, which in some instances, meant practically an embargo resulted in such a loss of markets that Canada had already built

such an extent that in 1934 we exported to Great Britain alone one hundred and twenty-five million of pounds, and as the quota granted to Canada under the Ottawa Agreements is two hundred and eighty million of pounds, it is readily seen that there is plenty of room for expansion of the bacon industry in this country.

I pointed out at the start that the prosperity of the post-war years was a result of our ability to find a market for anything that we had to sell, and I now make the statement that prosperity can only return by the regaining of these markets. Mr. King's record shows us, even during an era of world prosperity, he could not hold the markets for the western agriculturist. In comparison, the record of Mr. Bennett proves to us, that even during a period of great world distress and depression, he has by his ability to negotiate trade agreements, recovered to a great extent the markets which had been lost to us. The government of Mr. Bennett has for some time been negotiating with the United States of America in an effort to form some reciprocal trade agreements with the great republic to the south of us, and I believe, judging from his success of trade negotiations within the Empire that he will presently succeed and again open up for Canadian producers that great market, the United States of America. One could go on at great length enumerating the different legislation, such as the Farmers' Creditors Arrangement Act, the Marketing Act, etc., that have been enacted by the administration of Mr. Bennett for the assistance of Western agriculture, but space will not permit.

I have attempted with the limited space at my disposal to point out the records of Mr. Bennett and Mr. King, and since the political history of Canada contains no record of achievement of any independent group, it is one of the duties of good citizenship to study carefully the policies of these two men, so that our franchise may be used, not to ensure the success of any political party, but to ensure the future well-being of the Dominion of Canada and our Canadian people. The privilege of voting is given to us not only that we may select our own representatives in parliament, but that we may, by the way we cast our vote, record for all time our approval of a man and his administrations.

As the Conservative candidate in the Federal Constituency of Red Deer I make this appeal and ask you to please remember that a vote for any other party is a vote of disapproval of the present Prime Minister of this country, and his policy of assistance to Western Agriculture; and that you go to the poll on the 14th of October and voice to the world your appreciation and your gratitude for the things that we have received, by casting your ballot for the Conservative candidate, because,

—A VOTE FOR STEWART is a VOTE FOR BENNETT!

Yours very sincerely

A. H. STEWART

Doings of Our Neighbors

AT SUNNYSLOPE: Henry L. Toewl
has a jar of different varieties of
crabapples grown in his garden and
on display at the Red & White.

AT OLDS: Tuesday night of last
week Norman Cook drove to town
in his car to attend a Social Credit
meeting in the Herdman office.
Cook parked his car on the scales
which are directly in front of the
office. After the meeting, and to
his dismay, the car was gone, and
the next procedure was to report the
matter to the police. The car was
found in Red Deer very soon after it
took the thief or thieves the time to
arrive there, which was a matter of
about an hour-and-a-half. The joy-
riders eluded the police by abandon-
ing the car on arriving at Red Deer.

Frank Jeannot had to go hunting
Tuesday (last week), when 17 coy-
otes escaped from their cage at his
fox farm. He managed to shoot 12
of them, but five are still at large.

Registration of students at the
Olds School of Agriculture is pro-
ceeding very satisfactorily. One-
hundred and thirty-five students are
already enrolled, which augurs well
for a "full house" when the term
opens, October 22.

AT RED DEER:—A federal contract
has been awarded to Turner and
Ellenwood, Red Deer contractors,
for the enlargement of the armories
here, work on which will commence
immediately. The contract is in
the neighborhood of \$7,000.

Mountain View Notes

The September meeting of the
Mountain View W.I. was held in
Community Hall. As harvest oper-
ations were in full swing many of
the members were unavoidably ab-
sent. Those present decided to
hold a tea and sale of home cooking
at the home of Mrs. H. Pearson on
October 19th from 2:30 to 6 p.m.
One of the features of the afternoon
to be tea-cup reading. The next
meeting to be held in Community
Hall on the third Thursday as usual.
All members requested to help with
luncheon. Mrs. Hill and Mrs.
Blain acted as hostesses for the
above meeting.

Miss Goldie, teacher of Mona
school, received the prize last week
for holding the championship of the
Junior Ladies Tennis organization
for Alberta.

Two weeks ago the pupils and
teacher of Mona school journeyed
to Huntcliffe and a very interesting
baseball match was staged at which
Mona were the losers. The pupils
and teacher of Huntcliffe served a
delicious lunch to the visiting base-
ball team.

Westcott Notes.

The Westcott Women's Insti-
tute met at the home of Mrs. Harry
Steckley on Thursday.

The meeting opened with the
singing of O Canada and the repe-
tition of the creed.

The fall bazaar was then discus-
sed and it was decided upon to
have a program and bazaar at
Westcott school on Friday, No-
vember 15th.

An interesting contest was then
solved and a recitation was given
by Donald Robertson.

The meeting closed with the sing-
ing of God Save the King, and
lunch was served by the hostess.

The next meeting will be held at
Mrs. Wilfred Rennie's at 2 p.m.
sharp.

Evangelical Church Notes

Rev. Otto H. Rollis, pastor of the
United Church at Bowden, will be
the guest-preacher at both the morn-
ing and evening service on Sunday.

WEEKLY SERMONETTE

True politeness is to do and say
The kindest thing in the kindest way

SEALED TENDERS addressed to the
undersigned and endorsed "Tender
for Breakwater, Sylvan Lake, Alta." will be received until 12 o'clock noon,
Monday, October 14, 1935, for the con-
struction of a breakwater (with pile and
cribwork approach) at Sylvan Lake,
Alberta.

Plans, form of contract and specifica-
tion can be seen and forms of tender
obtained at the office of the Chief Engi-
neer, Department of Public Works, Ottawa,
at the offices of the District Engineer,
Customs Building, Winnipeg, Man.; Win-
nipeg Builders Exchange, 612, Confedera-
tion Life Bldg., Winnipeg, Man.; also
at the Post Offices at Sylvan Lake, Alta.,
Red Deer, Alta., Calgary, Alta., and
Edmonton, Alta.

Tenders will not be considered unless
made on printed forms supplied by the
Department and in accordance with the
conditions set forth therein.

Each tender must be accompanied by a
certified cheque on a chartered bank in
Canada, payable to the order of the
Honourable the Minister of Public Works,
equal to 10 per cent of the amount of the
tender, or Bearer Bonds of the Dominion
of Canada or of the Canadian National
Railway Company and its constituent
companies, unconditionally guaranteed
as to principal and interest by the Domi-
nion of Canada, or the aforementioned
bonds and a certified cheque if required
to make up an odd amount.

NOTE.—The Department will supply
blue prints and specification of the work
on deposit of a sum of \$20.00, in the form
of a certified bank cheque payable to the
order of the Minister of Public Works.
The deposit will be released on return of
the blue prints and specification within a
month from the date of reception of
tenders. If not returned within that
period the deposit will be forfeited.

By order,
N. DESJARDINS,
Secretary.

Department of Public Works,
Ottawa, September 23, 1935.

What Kind of Representation Do You Want ?

Do you want a man who knows the Red Deer riding like a book?

Do you want a man who is able, intelligent and fearless?

Do you want a man who has rendered exceptional service to the Return-
ed Men and who is thoroughly familiar with their problems?

Do you want a man who has spent more than twenty-five years in the
study of economic and financial questions?

Do you want a man who has been an outstanding member of the U.F.A.
group at Ottawa—a group that has asserted a powerful influence
on much of the beneficial legislation passed during the passed fifteen
years?

Do you want a man who has for fourteen years advocated true Social
Credit and nationalization of finance?

Do you want a man who has become an authority upon the marketing
problems of agriculture, and who is an outstanding proponent of the
Natural Products Marketing Act?

Do you want a man who has proved his readiness to co-operate with
others for the common good and who will support good legislation
from whatever source?

Do you want a man who is free from partizan ties?

Do want a man who votes as he thinks and not as he is told?

Do you want the best possible representation at Ottawa?

WORLD HAPPENINGS BRIEFLY TOLD

Something new in the way of freak wheat plants was grown by W. F. McCallum, McGee, Sask., farmer. A single spikelet of oats with two grains was found on a head of wheat about half way up the spike.

Smooth starting and stopping, and rapid acceleration are claimed for a new turbine drive engine with only coupling rods visible to appear shortly on the London and Scottish railway.

Struck in the eye by the sight on her gun from the recoil as she fired at a mountain goat, Mrs. P. A. Curtis, of New York and Bermuda, suffered the loss of the eye in hospital at Jasper, Alta.

An increase of more than \$1,000 over last year was reported for the Canadian National Institute for the Blind booth at the Canadian National Exhibition. Sales were \$7,909.88 compared with \$6,499.41 last year.

Stipends greatly below the rates fixed by the assembly regulations are received by large numbers of Presbyterian clergy in Montreal, it was reported at a meeting of the presbytery called to appoint a minister to a new charge.

Henri Rivest, who describes himself as a "professional tipster" for insurance adjusters and pleaded guilty to setting eight fires in the north end of Montreal, was sentenced to five years in penitentiary by Judge J. A. Metayer.

Invention of a wire screen similar to a dog muzzle in design to fit over automobile headlights as a protection from flying stones on gravelled highways has been patented in the United States and Canada by Noel F. Judah, of Edmonton, who has formed a syndicate for manufacture.

Premier Mitchell Hepburn of Ontario, on a western election tour, saw his first ranch, the 100,000 acre McIntyre ranch on the Milk river ridge south of Lethbridge, where 4,000 "white-faces" are run on a "farm" on which there are 145 miles of fence.

The Automobile World

Over Thirty-five Million Cars Are In Use

The motorist who brags of 100,000 miles has still some distance to go to cover the world's highways. In a little booklet issued by the Automobile Manufacturers' association, packed with unusual and interesting information, it is stated that there are 9,231,000 miles of highway in the world.

The United States has 3,065,254, one-third of the total. Soviet Russia is second with 1,682,109, and Japan, rather surprising in view of its small area, is third, with 594,626. Australia takes fourth place, with 468,251, and Canada is fifth with 409,124. At the other end of the scale is Gibraltar, with 15 miles of road, and French Somaliland with 25. But Gibraltar has 66 cars to each mile of road, while the United States has only 8.1 per mile, and Canada 2.7.

According to the booklet, the average life of cars is 8½ years. It is said also that 95 per cent of all cars sell for less than \$750 wholesale; that farmers use 26 per cent. of all trucks; that there are 35,987,000 motor vehicles in the world, of which 71 per cent. are in the United States; that motorists pay six times the taxes they paid 15 years ago; that in automobile deaths per 10,000 motor vehicles Canada has the second lowest standing in the world, with 9.1—second to New Zealand's 6.6—and Italy the highest at 54.5.—Edmonton Journal.

Fruit Imported By Canada

Canada, the United Kingdom, France, Germany and Austria are leading world importers of fruit. Canada does not require to import apples, but the average annual import of other fruits into Canada from 1928-32 included 74,000 tons of bananas, 73,000 tons of oranges, 20,000 tons of dried grapes, 12,000 tons of lemons, 11,000 tons of grapes, and 8,000 tons of pears.

The ending of a play running in London has been altered. A cautious critic complains, however, that it hasn't been put any nearer the beginning.

Pictures Without Camera

First Movie Film Of This Kind Is Made In London

The first motion picture film ever to be made without a camera was shown to the public in London, Eng., under the auspices of the post office.

It consisted of colored patterns which moved in tempo with a rumba played on the sound track of the film. The patterns were applied directly to the film by hand.

The invention was made by an Australian artist, Len Lye, who sought by use of a film to avoid the mechanical difficulties encountered in providing a color accompaniment to music by means of electric lights.

The post office has ordered other films of the same nature, which will be used to advertise its services.

Linen For Airplanes

Extensive orders for aeroplane linen for civil and Government aeroplanes have been placed recently in Belfast. Not since the war have so many looms been kept busy with this branch of manufacture.

C. N. Exhibition

Most Successful Held Since The Peak Year Of 1928

Directors of the Canadian National Exhibition reviewed the most successful exhibition from a business standpoint since the peak year of 1928.

The big fair closed with 151,000 persons attending the impressive closing ceremonies. Total attendance for the two weeks of the exhibition was 1,651,000, an increase of 148,000 over last year.

Officials estimated retail and wholesale purchases were 32 per cent. higher than any year since 1928. The number of foreign buyers was twice that of any previous year.

Has Driven Million Miles

A million miles in a car is the record of Eva Jordan, who began to drive a car when she was 52 years of age and has used 14 cars, has covered 1,000,000 miles in 12 years without an accident. She carries State patients from all parts of Iowa to the State University Hospital at Iowa City.

HONORS PIONEERS

—Canadian Pacific Photo.

Sir Edward Beatty, G.B.E., chairman and president of the Canadian Pacific Railway, is shown here beside the cairn which marks at Craigellachie, B.C., the spot where Lord Strathcona, in the presence of Sir William Van Horne and others of Canada's railway giants, drove the last spike completing the Canadian Pacific Railway from ocean to ocean across more than 3,000 miles of formidable country, on November 7, 1885. In the golden jubilee of the Canadian Pacific's history, Sir Edward, during his current trans-Canada tour, dropped off his special train at Craigellachie to pay his respects to the memory of the builders of his great transportation company and to receive the greetings of Craigellachie's handful of citizens.

A
Crocheted
Blouse
in a Lacy
Stitch

PATTERN 5426

The individuality of this crocheted shirtmaker blouse doubles its charm, and when you find how easy it is to make, you'll want to go right on and crochet a plain skirt for it, too (pattern 5353). Then you'll have a two-piece ensemble to wear right through the Fall and Winter. The lacy stitch which composes the entire blouse is very quickly learned by heart, and a grand one to add to your crochet repertoire. The blouse has raglan sleeves, which are so easy to fashion, while the pretty bow is made of strands of the same wool. The buttons make a smart trim, and sleeves may be either short or long.

In pattern 5426 you will find complete instructions for making the blouse shown; an illustration of it and of the stitches needed; material requirements. The blouse comes in size 16-18 and 38-40. Price of pattern 20c.

In pattern 5353 you will find complete instructions for making the skirt shown in sizes 16-18 and 38-40; an illustration of it and of the stitches needed; material requirements. Price of pattern 20c.

To obtain these patterns send 20 cents each (40 cents for both) in stamps or coin (coin preferred) to Household Arts Dept., Winnipeg Newspaper Union, 175 McDermot Ave. E., Winnipeg.

There is no Alice Brooks pattern book published

A Waste Of Money

Speeding Uses Up Much More Gasoline And Oil

The toll of human life taken by reckless driving on our highways; the injuries and inconveniences due to unnecessary speed, are forceful enough arguments in themselves to urge caution on motorists. And the United States Bureau of Standards has compiled significant data to show that speeding is also a waste of money, in that the faster an automobile is driven the more gasoline it consumes.

A car capable of getting 18 miles out of a gallon of gasoline, when driven 30 miles an hour, for example, will get only 16.4 miles to the gallon, according to the bureau figures, when pushed up to 40 miles an hour.

At 50 miles an hour the same car will get 14.6 miles to the gallon, at 60 miles an hour it will get 12.6 miles, and at 80 miles an hour it will get 8.6 miles per gallon.

In addition to this, nearly seven times as much oil is used up at 55 miles per hour as at 30 miles an hour. These are facts well deserving of publicity.—Hamilton Spectator.

The Manx Language

Only One That Does Not Contain Swear Words

Interest in the Manx language, which has been on the verge of extinction, is being revived by the Manx Society, composed of ardent nationalists of the Isle of Man. When the last Manx census was taken, four years ago, 529 persons could speak in Manx, but 60 per cent. of them were then over 65 years of age. A peculiarity of the Manx language is that it contains no swear words. How Manx golfers were able to relieve their feelings a few years ago, when the language was generally used on the island, is being asked by those against the new movement who contend that perhaps that may be why Manx has gone out of use.

Durum Wheat

Will Be Marketed And Dealt With By The Canadian Wheat Board

All durum wheat grown in western Canada this year will be marketed and dealt with by the Canadian wheat board in the same way as ordinary wheat, Prime Minister Bennett stated in answer to queries which he said had come to him from many quarters.

Durum wheat is used mainly for macaroni-making and other processing rather than for milling purposes.

Montreal Banker

Sir Gerald Aylmer Succeeds To Baronetcy

To the list of Canadian baronets was added recently the name of Sir Gerald E. F. Aylmer, retired branch manager for the Bank of Montreal. He resides in suburban Westmount.

Sir Gerald succeeds in the baronetcy his first cousin, Sir Fenton Aylmer, V.C., of London, who died without issue. The baronetcy was created in 1621 and Sir Gerald is the 14th baronet.

Success Through Failure

It is a mistake to suppose that men succeed through success; they much oftener succeed through failure. By far the best experience of men is made up of their remembered failures in dealing with others in the affairs of life. Such failures in sensible men incite to better self-management, and greater tact and self-control, as a means of avoiding them in the future.

Sunlight Is Trapped

Ingenuous Device Ensures Full Benefit Of Sun's Rays In The Home

In a block of flats now being built in London, sunlight is being "laid on."

Not just sun-ray lamps or artificial sun-ray apparatus, but real sunshine, so harnessed that it switches itself on as soon as the sun appears, and switches on the electric light as the sun disappears.

This is the first installation in England of an ingenious device invented by a French engineer, Jacques Arthuys, which puts sunlight "on tap" for domestic lighting.

The device enables every room in a house, including the darkest cellar, to be efficiently lighted by the rays of the sun, even with blinds drawn across the windows, or even if there are no windows.

This is achieved by an arrangement of mirrors and lenses. Up on the roof there is a big mirror mounted on a slowly rotating axis, operated by a tiny 1-6th horse-power motor.

A mercury thermostatic device, worked by the heat of the sun, controls the motor and thus keeps the mirror moving just enough to make it follow the sun across the sky—so that it is always receiving the direct rays over its entire surface of 40 square feet.

These rays are reflected by another mirror fixed at an angle that will deflect them down a vertical shaft to the basement. At the height of the ceiling in each room are mirrors, so arranged that a number of descending rays are trapped as they reach each storey and deflected to the ceilings of the rooms surrounding the shaft.

The rays are then finally deflected from room to room through small apertures in which mirrors are set. Should the sun go behind a cloud the mercury in the thermostat begins to fall. That action is sufficient to switch on the electric light.

To make the efficiency of this apparatus complete all the mirrors are polished automatically by an arm which operates from the main motor. This wipes each mirror over after one complete rotation of the central mirror on the roof.

Stronger In Frozen State

Zero Temperatures Do Not Weaken Wooden Supports

Because trees are often heard to crack or pop in below zero temperatures and limbs seem to break off more often in winter than in summer, many believe that intense cold definitely weakens wooden members and that ordinarily safe mow or bridge supports might approach the danger point in below zero temperatures. Tests at Syracuse University show that there is no basis for such belief, but that on the contrary both green and kiln dried wood are stronger in a frozen state than at ordinary temperatures. The green wood shows the greatest increase in strength, doubtless because of its greater moisture content.

Prefer Cigarette To Pipe

Fritzie's pipe, long the symbol for things Germanic, is finally surrendering to the more modern cigarette and cigars. In 1934-35 cigarette consumption in the Reich was 36,073 millions or an increase of seven per cent. over the former 12-month period. Smoking tobacco consumption declined three per cent. over the same period. Cigar consumption increased 20 per cent.

Alexander the Great was born in Europe, died in Asia, and was buried in Africa.

Salt Money

Salt is so precious in Tibet that it is used for money, stamped with the Prince's mark. Full tribes exchange gold for it. Windsor Salt, uniformly pure, would surely be high standard in gold value!

"One Wide River To Cross"
"The Unknown Port", Etc.

SYNOPSIS

Nancy Nelson is a sub-deb, a gay, irresponsible girl of nineteen, with no care beyond the choice of her costume for her coming-out party. Suddenly, in the market crash, her indulgent father loses all he had, and his family is faced with the necessity of a simpler method of living. At this juncture a letter is received from an eccentric relative in Colorado, who offers the girl a home on what seems to be impossible conditions.

After much consideration Cousin Columbine's offer is accepted, and Nancy and Jack arrive at Pine Ridge.

Nancy set out one afternoon to climb to the top of a hill so as to obtain a view of the surrounding landscape and misses the path Aurora Tubbs had told her to follow. A truck comes along the road, driven by Matthew Adams, and she asks him which way to go. They ascend the hill, look around, and then go on to Cousin Columbine's. There Mark Adam tells Nancy that his brother Luke has broken his leg, and that Jack Nelson has been hired to help out while Luke's leg gets better. With Jack away, Nancy finds that she is lonesome, and having no books to read, the idea of starting a public library at Pine Ridge seems a good one, and Nancy writes home to get her parents to send all the books they could spare and all they could induce others to let them have.

Nancy and Matthew Adam go Christmas shopping in a neighboring town. On their return to Pine Ridge, Nancy is amazed to see the Columbine residence all lit up, and asks Matthew if he knows why. He said: Let's go in and see. Then Nancy learns that she is having her debut, but in a different setting than had been planned for her in Boston.

Nancy's parents and friends gave their liberal support to her request for books, and a sizeable box arrived in due course. Father Adam painted a sign for the library, and the Adam boys worked on the shelves for the books and decorations to make the room look presentable.

Now Go On With The Story

CHAPTER XVI.—Continued.

It was that evening, seated before a crackling hearth-fire at the Adam ranch, that Cousin Columbine told them the story of the Pemperton

hoax. Jack had been asking about a pathetic little cemetery he passed one day when doing an errand for Mr. Adam.

"It's on a hillside back from the road," he told them. "Most of the graves seem to be children's and unmarked. Was there ever a smallpox epidemic in these parts, Cousin Columbine? It seemed strange finding a cemetery way off there."

"He means that little burying ground near West Creek, doesn't he?" questioned John Adam.

"Not if West Creek's a town," responded Jack.

"Do you recall a mile or so farther on, passing a dwelling house and two ramshackle buildings that looked fit to collapse at the first high wind?" asked Cousin Columbine.

Jack nodded; and the old lady continued: "Those buildings, and that wayside cemetery, are all that remain to tell the tale of a prodigious hoax which was planned and carried out successfully by old Marsh Pemperton. You Adams have heard the story many times."

"Never from you," Eve Adam reminded her. "Tell it again, Miss Columbine. You saw the place in its heyday, I suppose."

"I surely did; and to one of my age it's not even ancient history. The Pemperton hoax was started in 1894, soon after the boom at Cripple Creek. I dare say that as a child, Eve, you heard your people mention it, for the news must have spread much farther than Denver. You see, the general feeling in those days was that all these mountains were lined with gold, and that any one could take a pick and dig it out; but old man Pemperton had been working a tunnel with no success, and I dare say he got impatient."

"How much of the land 'round there did he own, Miss Columbine?" asked Luke.

"That I can't tell you; but it was plenty anyway, and the lurid tales of quickly gotten wealth at Cripple Creek probably made him furious that his own acres were useless save as pasture land. So at last he determined to make use of the prevailing excitement to feather his nest, an idea which he carried out with exceeding shrewdness, as you shall hear."

"I sometimes wonder," went on Miss Columbine dreamily, "if old Marsh Pemperton started this hoax on a sudden impulse, or if he lay on his bed in the long, still hours of night in that peaceful valley, and planned it out. At any rate, he made a trip to Cripple Creek to purchase some gold ore; and a week or two later he emerged from his tunnel stuttering with excitement and both hands full of nuggets!"

"I'll say your friend Pemperton wasn't burdened with a New England conscience," observed Jack.

"He was no friend of mine, Jack Nelson, nor of Father's either, I am glad to say. For that hillside cemetery with its pathetic graves is the direct result of this fraudulent scheme of his. It was easy enough to start a gold excitement. The news spread rapidly, as such news always does; and it wasn't long before the

stampede began. There was pandemonium in that lovely valley. People staking out claims—starting tunnels—buying 'town lots' which Pemperton himself marked out and sold at sky high prices. One fortunate woman who had paid twenty-five dollars for a strip of land in that locality a year before, sold it during that hectic time for ten thousand! That sounds incredible now, but it's the way things go in boom days. I've seen it happen."

"More than a thousand people, possibly twice that number came pouring in. The town was incorporated; a man named Tyler was made mayor, and another whose name I can't recall was sheriff. When I saw the place there were no less than a dozen saloons—three general stores—a long street of frame houses or tents, and even two ore-crushing machines, though not one ounce of precious metal was ever discovered in the vicinity."

"What became of the people when the bubble burst?"

"Drifted away, poor souls, leaving their dead behind them—their high hopes crushed. I recall one family stopping at our house for water, and Father bringing them in to be fed and warmed. They were a pitiful sight: the young mother frail and worn by hardship, the father in ragged shirt and trousers, and an ailing baby. They promised to let us know how things went with them, but we never heard."

"Ships that pass in the night," said Matthew softly, and Luke broke in:

"But will you tell us how old Pemperton escaped being tarred and feathered when the hoax was discovered?"

"For the very good reason," replied Miss Columbine, "that the scam was nowhere to be found! When the boom was at its height he disappeared; and now all that is left of the 'ghost city' which bore his name, are those tumble-down buildings (one of which cost a woman five thousand dollars, I was told), and that small burying ground where lie the bodies of those who were too frail to survive the rigors of frontier life."

"I'd like to see that place," said Nancy, as Cousin Columbine ceased speaking.

"You shall, my dear; and we'll make an excursion out on the plains as well. They can be so beautiful, our western prairies, that I hate to think how cruel they sometimes are."

"Cruel?" Nancy questioned, a little puzzled. "You mean those sudden blizzards when the grazing cattle have no shelter? Well, this winter's over, Cousin Columbine, and if you've no objection I'll start getting acquainted with the plains to-morrow. I've got a marvellous idea. Why can't I ride to Prairie Ranch with Jack and Matthew? It would be a lark."

"You're a new woman, Nancy Nelson," remarked her brother, "if you regard as anything like a lark the necessity of piling out of bed along with the robins! We'll pass your tower at five a.m., young lady. Do you think you can make it?"

"Of course she'll make it," put in Matthew eagerly. "We'll get lunch at Uncle Tom's, Nancy. It'll be bully having you along."

Thus it was settled, though on the ride home that night Cousin Columbine predicted a change of weather. Despite this prophecy the sun was shining when Nancy awoke, dressed rapidly, and slipped downstairs on tip-toe; but as she passed the lower bedroom a call arrested her.

"That you, Nancy?"

Nancy opened the door.

"Did I wake you up? You were wrong about the weather, Cousin Columbine. It's a lovely morning."

"What are you wearing?"

"My knitted sport suit. I dare say I'll roast, but I won't take any wrap except my hiking sweater."

"Indeed you will!" Cousin Columbine sat up in bed, stretching a hand toward the window as if to feel the atmosphere. "There's a chill in the air, different from anything we've had this long time. Take your fur coat, Nancy, or I shan't have an easy moment all day long."

"My fur coat! Why—"

"Don't argue," snapped the old lady. "I know this country better than you do. I've seen days start out like summer this time of year, and end with a snow storm. I'm respons-

ible to your parents for your safety, child; and I—I command you to take that coat."

Nancy laughed, realizing that there was no use in combating an old lady over seventy.

"All right," she said good-naturedly, "the coat goes along as an extra passenger. I'll run up for it now."

"What sort of stockings have you got on?"

The question caught her at the door, and the girl turned, a bit exasperated.

"Don't let that worry you! I'm wearing sport shoes and woollen hose. I shan't freeze to death, Cousin Columbine, even if we get one of your spring blizzards."

She was surprised to note that this absurd remark was taken seriously.

"Look here, child, don't you start home in any sort of storm. Remember that. You think me foolish no doubt, but I've seen a good two feet of snow later than this, and herds of cattle frozen in the drifts out on that prairie. Close my window, Nancy. I may as well get up and see what's happening."

She was on the porch when they rode away, a troubled look in her usually placid eyes that Nancy remembered afterward. She made sure that Jack had taken his sheep-lined coat—looked up at the sky, and said at the last moment: "I sort of wish you wouldn't go, Nancy. There's something in the air this morning that I don't like."

"Now don't you worry, Miss Columbine," soothed Matthew. "If there's the least suspicion of bad weather, we'll keep her safe at Uncle Tom's until it's over."

This seemed reasonable; and as they waved good-bye a robin hopped down from a spruce tree and began his breakfast at Miss Columbine's bird board. But even this emblem of the springtime failed to cheer her.

"I ought to have set my foot down," she said soberly when Aurora Tubbs arrived an hour later. "I don't like this air."

The sun played hide and seek all morning, and at last retired behind a cloud and stayed there. At noon a wind sprang out of the north, rattling the shutters of the Nelson mansion with sudden fury; and ten minutes later a flurry of blinding snow had shut them in. Columbine Nelson kept going to a window and staring out. Her lunch was left almost untasted. Twice she sat down at the telephone and then turned away, knowing that if there were anything to say Eve Adam would have called her.

The storm increased; and at half past four, after moving restlessly about the house, Miss Columbine stood so long at the front window that Aurora, who had been curiously silent during those dragging hours, burst out: "Don't you keep fretting so, Miss Columbine. It makes me nervous. Didn't Matt Adam promise they wouldn't start if it was stormy?" And besides, Mark'll be with 'em on the way back, and he's real level-headed come an emergency."

"That's what I've been telling myself all day," replied Miss Columbine. "Even if they started before the storm began, Aurora, Mark would have sense enough to—There's the telephone!"

Her hand trembled as she lifted the receiver; and Aurora stood close by, head bent in an effort to catch the distant voice.

"That you, Miss Columbine? I've tried to get you all the afternoon, but our line was in trouble. Jack hasn't left, I hope. Tell him not to

DON'T RISK BAKING FAILURES....

"DON'T TAKE CHANCES WITH INFERIOR BAKING POWDER. LESS THAN 1¢ WORTH OF MAGIC MAKES A FINE, BIG CAKE. AND MAGIC ALWAYS GIVES GOOD RESULTS."

says MISS ETHEL CHAPMAN, popular cookery editor of The Farmer.

Leading Canadian Cookery Experts warn against trusting good ingredients to inferior baking powder. They advise MAGIC Baking Powder for perfect cakes!

CONTAINS NO ALUM—This statement on every tin is your guarantee that Magic Baking Powder is free from alum or any harmful ingredient. Made in Canada

try to get out here to-night. Luke and his father can—"

"Jack! He's not here, Eve," broke in the old lady, her voice shaking. "Surely they didn't leave your brother's in such a storm!"

"Not there?" A pause, and then Eve said, trying to speak calmly: "Listen Miss Columbine. Can you hear clearly?... Tom telephoned at seven this morning for them not to come—that Mark was flat in bed with a bad throat. It was too late to stop the children anyway, so I didn't call you; and later my brother phoned again. He—he said Jack and Nancy started back immediately after an early lunch. I told him it looked as if a storm were coming, but he said the sun was glorious out there and that—"

"Then—then Mark's not with them?" almost wailed Miss Columbine.

"No, but— Oh, don't worry yourself sick, dear Miss Columbine! There are ranches not so terribly far apart, you know; and there's a schoolhouse. Surely they would have reached the schoolhouse and waited there! But I'll try and get the ranch again by telephone and..."

It was then that the storm did something to the wires, and Columbine Nelson heard no more. But three hours later, just as the dreaded night was shutting down, the Adam truck with John at the wheel, and Eve, covered with snow from head to foot beside him, fought its way into the yard and stopped before the door.

(To Be Continued)

Little Helps For This Week

Thou calledst in trouble and I delivered thee. Psalm 81:7.

Be strong and of good courage, dread not nor be dismayed. 1. Chronicles. 22:13.

Thou canst calm the troubled mind,
Thou'st dread canst still
Teach me to be all resigned
To my Father's will.

Though this patient meek resignation is to be exercised with regard to all outward things and occurrences of life, yet it chiefly respects our own inward state, the troubles and weaknesses of our own souls. And to stand in a meek resignation to God, when your own impatience and pride attack yourself, is a higher and more beneficial performance of this duty than when you stand turned to meekness and patience when attacked by the pride or wrath of other people.

Raisins Treated With Oil

Stickiness Is Removed And They Look More Attractive

Seeded muscat raisins are sticky, making it necessary for women to coat their hands with flour in order to handle them. The seeds that were removed were also sticky, and handling them was a messy job for the technical men in charge of the process. Chemists tackled the problem, and they succeeded in making the raisins supply the solution. As a result the raisins are now being oiled, and in addition to being easier to handle because of the lack of stickiness, they present such an attractive appearance that the packers are now able to market them in transparent wrappers.

A good-hearted man carries some of it in his pocketbook. 211

WHEN USING WILSON'S FLY PADS

READ DIRECTIONS CAREFULLY AND FOLLOW THEM EXACTLY

Knox United Church Notes.

The services next Sunday will be at the usual hours, namely, Westcott 11 a.m., Westerdale 3 p.m. and Didsbury at 7:30 p.m. The pastor will continue the studies on the Ten Commandments, the Second Commandment being the theme. We cordially invite all interested to attend any of these services.

We wish to remind our friends of the Harvest Supper and the Travel Talk on Yellowstone Park which takes place in the Church on Friday October 18th.

We are getting nicely organized for our winter's work. The girls have been provided for by three groups following the C.G.I.T. program, the boys are being formed into Trail Rangers and Tuxis Groups, it now remains to organize a Young People's Group. See the poster in the lobby of the Church, and if any of our young people are interested, please mention it to the pastor.

Burnside Notes.

Mr. Geo. Metz spent Wednesday and Thursday of this week at Calgary and other points.

We were sorry to hear of the death of Mr. Jim Tate in the Calgary Hospital last Thursday morning. He was taken ill while attending the funeral of his father in Aylmer, Ont. last winter. After returning to Alberta this spring he was taken ill again at Benton, where he had been farming, and was taken to the Calgary Hospital where he died after 6 weeks' treatment. While farming here, on the Avelsdon place, he made a host of friends who will be sorry to hear of his death. The remains were forwarded to the East to rest beside his father in his old hometown Aylmer.

WEEKLY JOKE

Customer in drug store: "Please give me change for a dime."

Druggist: "Here it is I hope you'll enjoy the sermon."

Things To Remember

Conservative Meeting at Didsbury Opera House tomorrow (Friday) night Mr. A. H. Stewart will be the speaker.

* * * *

St. Hilda's Chapter of the Eastern Star Afternoon Tea on Monday, October 14 (Election Day) from 3 to 6:30 in the Atlas Lumber Co's Office. A good, substantial tea for the business men and choice of card or cup reading—all for 25 cents.

LOCAL & GENERAL

Charlie Cook was relieving at the local depot last week-end.

Maxine Beauty Parlor

MRS. B. DODD.

DIDSBURY OPERA HOUSE

Tonight—Thursday
That Brilliant Juvenile—
SHIRLEY TEMPLE
in
"Bright Eyes"
—the young star at her best!
She appeals to young and old

Saturday—3, 7:30 and 9 p.m.
DOUBLE FEATURE—
'WAR OF THE RANGE'
stars Tim Tyler in a cowboy and cattle rustling scene!
—and—
"The WOMAN WHO DARED"
Dynamic drama and stirring action; with Claudia Dell, Lola Lane, Monroe Owsley, Matty Fain

Next Wednesday and Thursday—
WILL ROGERS
the People's Choice—
in
"The . . . County Chairman."
You'll love him more than ever!
